1. The first group of authors (e.g., [1, 2]) has shown that the use of the term "cognitive" is not only not necessary, but also is not useful. The term "cognitive" is used to describe a wide range of phenomena, from the simple perception of the environment to the complex processes of reasoning and problem solving. This is a very broad and vague term, and its use is not helpful in understanding the nature of the phenomena it is intended to describe.

[illegible]

1. \mathcal{C}_1 is a \mathcal{C}_2 -subalgebra of \mathcal{C}_1 if and only if \mathcal{C}_1 is a \mathcal{C}_2 -subalgebra of \mathcal{C}_1 .
